6. Implications

## A regular slide with a list

The following items are important:

1. This thing

## A regular slide with a list

The following items are important:

1. This thing
2. Another thing, that is this

## A regular slide with a list

The following items are important:

1. This thing
2. Another thing, that is this
  - ▶ here are some additional sub points

## A regular slide with a list

The following items are important:

1. This thing
2. Another thing, that is this
  - ▶ here are some additional sub points
  - ▶ and another one

## A regular slide with a list

The following items are important:

1. This thing
2. Another thing, that is this
  - ▶ here are some additional sub points
  - ▶ and another one
3. A third thing, is this one

# A regular slide with a list

The following items are important:

1. This thing
2. Another thing, that is this
  - ▶ here are some additional sub points
  - ▶ and another one
3. A third thing, is this one
  - ▶ and another things

## Multicolumn Text and a picture

Here is some text that I would like to say. It is a paragraph of text. Most of the time I would not make a slide with a paragraph. It would be too much text. So, instead of a paragraph. Point form might work better

slide with a link

here is a link <https://crumplab.com>

## Text, quote and picture

Here is something Auguste Comte said:

*Well, not really, this is just a test quote to see what it would look like if someone said something.*

# Regular column atop multicolumn

Sometimes you might say something as general concept, like a distinction that has two parts.

## Distinction 1

- ▶ Has this thing

## Distinction 2

# Regular column atop multicolumn

Sometimes you might say something as general concept, like a distinction that has two parts.

## Distinction 1

- ▶ Has this thing
- ▶ This thing

## Distinction 2

# Regular column atop multicolumn

Sometimes you might say something as general concept, like a distinction that has two parts.

## Distinction 1

- ▶ Has this thing
- ▶ This thing
- ▶ and this thing

## Distinction 2

# Regular column atop multicolumn

Sometimes you might say something as general concept, like a distinction that has two parts.

## Distinction 1

- ▶ Has this thing
- ▶ This thing
- ▶ and this thing

## Distinction 2

- ▶ Has this thing

# Regular column atop multicolumn

Something in the middle

## regular markdown table

Syntax	Description	Test Text
Header	Title	Here's this
Paragraph	Text	And more

## R markdown table

speed	dist
4	2
4	10
7	4
7	22
8	16
9	10

## No color in the title

here is some text that I would like to say. It is a paragraph of text. Most of the time I would not make a slide with a paragraph. It would be too much text. So, instead of a paragraph. Point form might work better

# Overview slide

1. Big thing one
2. Big thing two
3. Big thing three
4. Big thing four
